# ABOUT US

Winner Wood stands at the forefront of companies specializing in the manufacture of high-quality wooden doors.

We combine deep expertise with modern technology to deliver products that meet the highest international quality standards.

Since our launch in the Gulf States, starting with the Kingdom of Saudi Arabia, we have set a clear goal to meet the needs of both major projects and individual customers, by manufacturing custom-designed doors or standard production to meet customer requirements.

Our factory, located in Badr Industrial City, spans an area of 6,000 square meters and is equipped with the latest production lines and advanced machinery.

This ensures precise manufacturing, speedy delivery, and high-quality production.

We use carefully selected materials that are resistant to heat, humidity, and climate change.

We proudly produce more than 30,000 doors annually, shipped to our customers worldwide, with a variety of manufacturing styles ranging from prefabricated doors to custom doors for special projects.

Behind this success is the Winner Wood family, which includes more than 150 employees, including engineers, designers, craftsmen, and workers, who work throughout the production process.

# OUR MISSION

# OUR MISSION

Our mission at Winner Wood is to provide integrated solutions for manufacturing high-quality wooden doors. We adhere to the highest quality standards, meticulous execution, and the finest materials, while maintaining competitive prices. This is to meet our customers' expectations and build long-term partnerships based on trust and excellence.

# OUR VALUES

# OUR VALUES

01

## Quality First

We adhere to the highest standards of manufacturing and finishing.

02

## Continuous Innovation

We continually improve our lines and technologies.

03

## Speed and Precision

We deliver fast execution without compromising precision.

04

## Transparency and Reliability

We believe in building long-term relationships built on trust.

05

## Customer Satisfaction

This is the true measure of our success.

# OUR ACHIEVEMENTS

# OUR ACHIEVEMENTS

More than 30,000 doors are produced and supplied annually.

Continuous expansion of production lines and operational capacity.

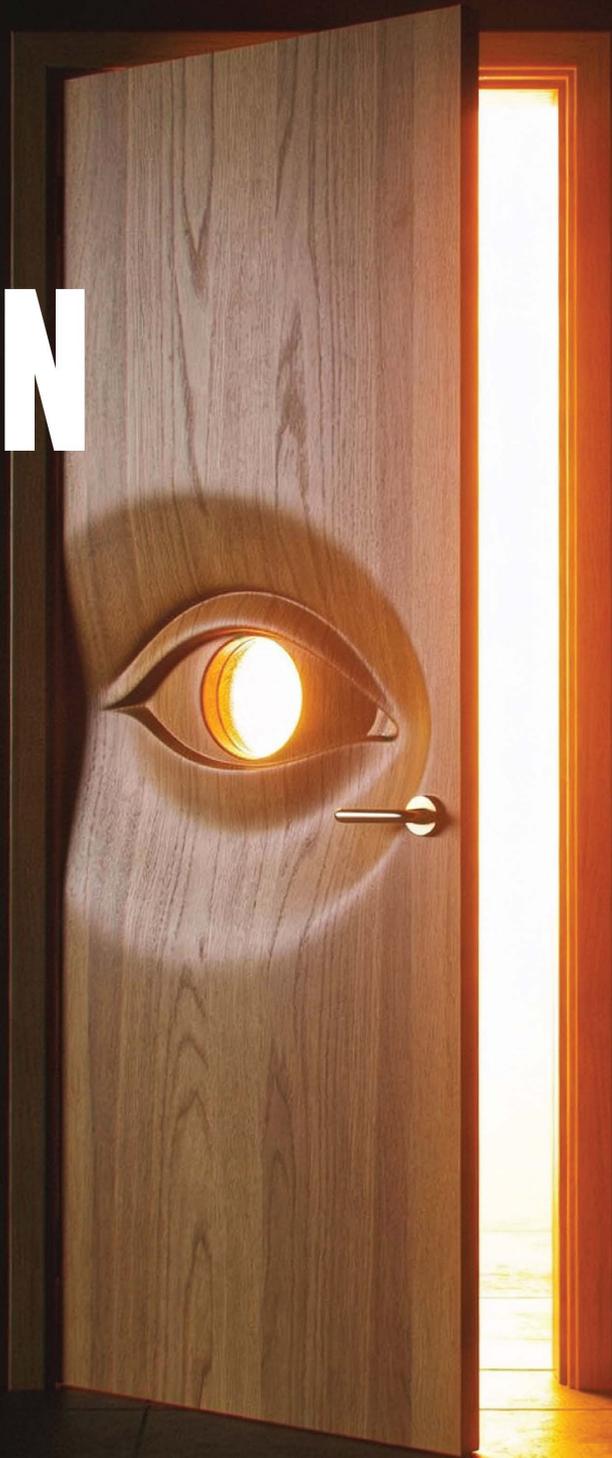

Projects implemented throughout the Gulf and Arab countries.

Long-term partnerships with major local and international contracting and real estate development companies.

# OUR VISION

# OUR VISION

Winner Wood aspires to become the leading name in the Middle East in the manufacture of high-quality wooden doors, with engineering innovations, superior finishes, and execution standards that compete with European companies. We also aspire to redefine the wooden door industry in the Middle East by offering products that combine quality and luxury, thanks to the reliance on the latest technologies, to create an exceptional experience that enhances trust and consolidates our position as a reliable partner in all local and international projects.

# OUR SERVICES

# OUR SERVICES

**Manufacturing, Supplying, And Installing All Types Of Interior And Exterior Wooden Doors.**

**We Manufacture Doors In Special Sizes, Designs, And Materials Upon Request.**

**Supplying Products For Major Projects Locally And Internationally.**

**Local And International Shipping Services.**

**Integrated Solutions In Door Technology.**

**Technical Consulting.**

**3D Designs.**

# CUSTOMIZATION

Winner Wood is not just a name in the world of wooden doors — it is a symbol of luxury and distinction. We create a complete experience that begins with an idea in your imagination, transforming it with our expertise and precision into a luxurious door that reflects your taste and embodies your identity. With premium materials, unique designs, and world-class quality, we craft doors that become timeless architectural masterpieces. Each of our doors is more than an entrance — it is an aesthetic signature and an architectural presence that immortalizes your style and gives your space a distinctive character that reflects who you are.

# ***GOOD QUALITY***

Winner Wood is a leading manufacturer of high-quality wooden doors, producing over 30,000 units annually for customers worldwide.

With many years of experience in manufacturing, installation, and management, we have built a solid reputation in the wooden door industry.

Supported by modern facilities, advanced machinery, and strict quality control, our products combine durability, craftsmanship, and elegant design—offering cost-effective solutions for modern living.

**WHY  
WINNER  
WOOD?**

# WHY WINNER WOOD?

Extensive expertise and continuity in premium door and furniture manufacturing.

Compliance with international quality standards in every product.

A highly skilled and professional team ensuring flawless execution.

Elegant, modern designs tailored to prestigious projects and refined tastes.

End-to-end solutions—from consultation to installation—delivering a seamless, luxury experience.

# OUR TEAM

## INFORMATION

Il nostro team è composto da esperti in vari settori, tra cui marketing, vendite e sviluppo. Siamo orgogliosi di poter offrire ai nostri clienti il miglior servizio possibile.

# *OUR TEAM*

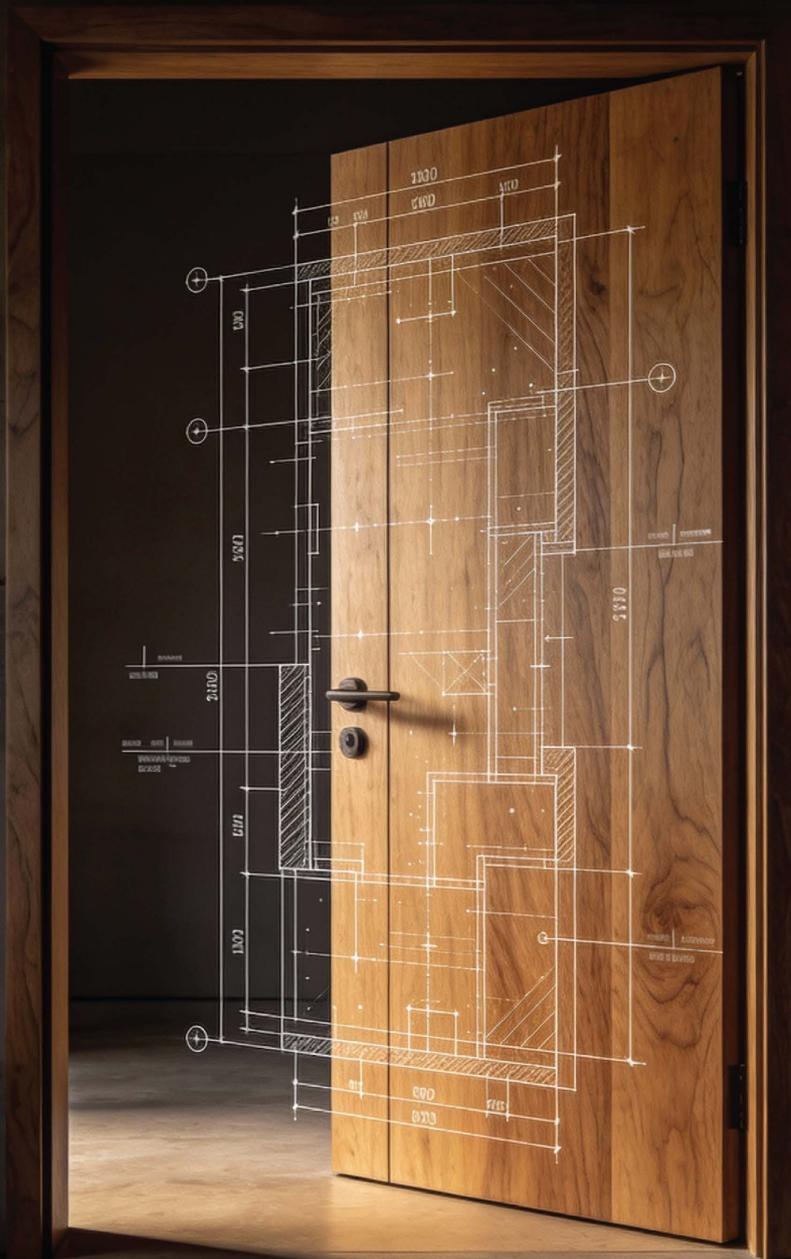

Our strength lies in people – we bring together one of the best teams in the industry.

## Our team includes:

Creative minds offering innovative solutions that balance style and functionality.

Trusted executors who transform concepts into reality.

# OUR HIGH-TECHNOLOGY MACHINES

We use the latest machinery and advanced technology to ensure top quality and higher production efficiency, so every door we deliver meets the highest standards of precision and finishing.

# OUR HIGH-TECHNOLOGY MACHINES

We pay attention to the finest details by using the latest edge banding machines to achieve exceptional quality and refined finishing. We pay attention to the finest details by using the latest edge banding machines to achieve exceptional quality and refined finishing.

# OUR HIGH-TECHNOLOGY MACHINES

With the latest global hydraulic pressing technologies, we give our products exceptional strength and superior stability, ensuring the highest levels of quality and durability.

# OUR HIGH-TECHNOLOGY MACHINES

Be relying on the best global glue distribution machines, we achieve uniform and precise adhesion, enhancing the quality of the final product.

# OUR HIGH-TECHNOLOGY MACHINES

advanced CNC systems allows us to execute the finest and most complex details and designs, delivering premium products distinguished by their quality and elegance, while giving each piece an artistic touch that transforms wood into exquisite masterpieces.

# OUR HIGH-TECHNOLOGY MACHINES

with the latest panel cutting machines, we manufacture products with ultimate precision and global quality that our clients deserve.

# INTERIOR DOORS

# **INTERIOR DOORS**

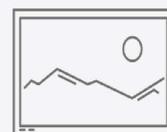

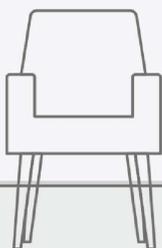

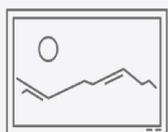

---

**Where simplicity meets elegance  
to create refined interiors.**

Every Winner Wood interior door is a canvas  
of refined details.

We create doors that add a personal touch  
reflecting your identity and completing the  
harmony of your space.

# INTERIOR DOORS

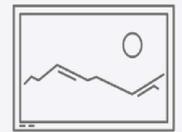

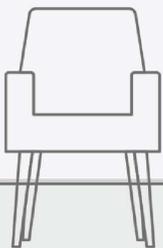

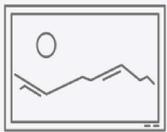

# **INTERIOR DOORS**

---

We pay attention to every detail, from the choice of premium materials to the precision of the final finish.

We present doors that embody elegance and luxury, granting you a refined environment full of comfort and beauty.

# EXTERIOR DOORS

## **Your home's façade... the masterpiece that reveals your taste from the first moment.**

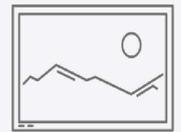

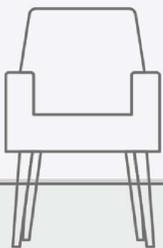

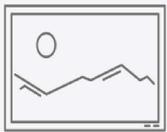

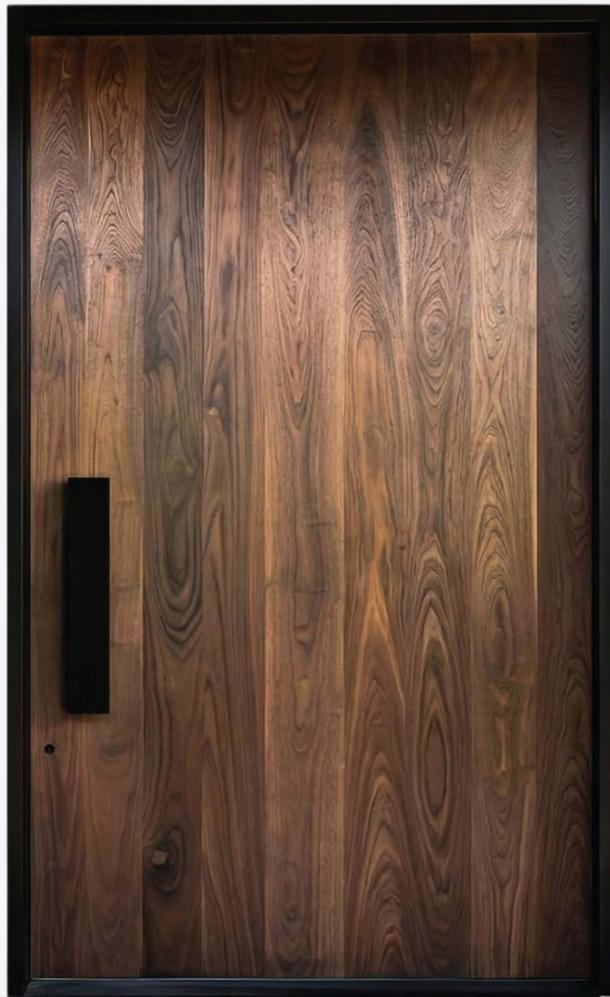

Winner Wood exterior doors are the first imprint of your home's luxury.

They are the place where elegance meets strength in every detail.

We design doors that give your entrance a majestic presence and a timeless impression of prestige.

With high-quality materials and distinctive designs uniting modern and classic styles, we create façades that tell the story of your distinction.

# EXTERIOR DOORS

## **A blend of security and luxury that welcomes guests while protecting your space.**

Every exterior door from Winner Wood embodies fine details and a unique touch that reflects your taste.

We pay attention to every stage, from design to final finishing.

We deliver doors that combine security with luxury, turning the façade into an architectural imprint that showcases your distinction and leaves an unforgettable first impression.

## **Exterior design that embodies luxury enduring through the years.**

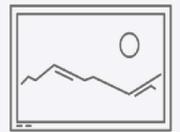

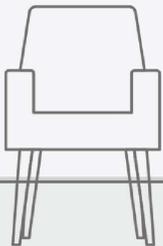

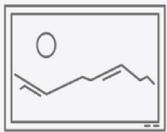

Winner Wood exterior doors embody the harmony of modern simplicity with the majestic grandeur of classic design.

We craft doors that give your entrance a blend of elegance and prestige.

They transform into architectural masterpieces that highlight your home's authenticity and reflect the refined taste of our clients.

# ***FIRE-RATED DOORS***

---

# ***FIRE-RATED DOORS***

---

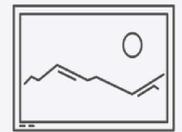

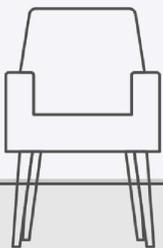

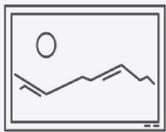

## **Safety that stands strong when it matters most**

Winner fire-rated doors are expertly engineered to serve as a critical part of building safety systems.

- Their primary purpose is to isolate and delay the spread of fire and smoke, providing essential time for safe evacuation and property protection.
- Winner fire-rated doors carry certified resistance ratings such as 60 or 90 minutes, meeting international standards including UL and NFPA, ensuring unmatched quality and reliability.

# ***FIRE-RATED DOORS***

---

# **FIRE-RATED DOORS**

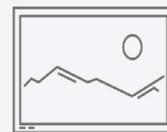

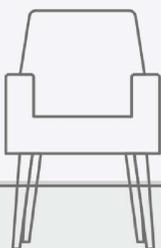

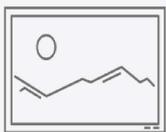

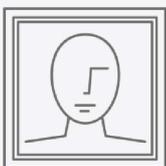

---

## **Advanced protection designed for lasting performance**

- Winner fire-rated doors feature a specialized design that combines safety with performance.
- Thermal insulation materials such as rock wool, smart expanding seals, and fire-resistant hinges, locks, and self-closing devices work together to prevent fire and smoke leakage.
- Durable and meticulously crafted, these doors deliver peace of mind while maintaining a refined, professional appearance suitable for any space.

# DOUBLE LEAF DOORS

---

# **DOUBLE LEAF DOORS**

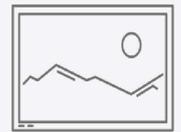

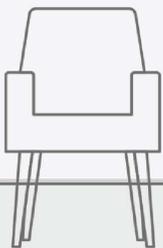

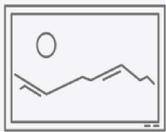

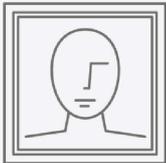

---

## **An exceptional entrance that embodies grandeur and prestige.**

- Winner Wood double-leaf doors are crafted to balance durability with sophisticated detailing and refined aesthetics.
- Strength and practicality meet luxurious finishes in every element.
- Winner Wood ensures long-lasting performance and everyday elegance, making each entrance a true statement of craftsmanship, quality, and timeless distinction.

# DOUBLE LEAF DOORS

---

# **DOUBLE LEAF DOORS**

---

## **An entrance that leaves an unforgettable first impression**

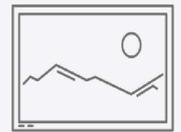

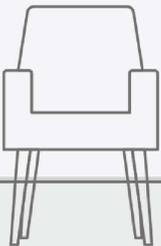

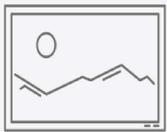

- Winner Wood double-leaf doors create unparalleled spaciousness and elegance, transforming wide entrances into a striking focal point of luxury.

- Their majestic presence enhances architectural character and visual balance.

- Winner Wood elevates the façade with refined design, highlighting grandeur and sophistication that add distinction to both the entrance and the surrounding space.

# SPACE SAVING DOORS

---

# **SPACE SAVING DOORS**

---

## **A smart choice for those seeking wider spaces with a contemporary spirit.**

Winner Wood sliding doors are not just practical solutions, but also a touch of elegance and luxury that redefines the concept of space utilization.

With sleek and modern lines, we design doors that grant you flexibility and add an architectural character reflecting your style.

## **The perfect balance between functional space and aesthetic beauty.**

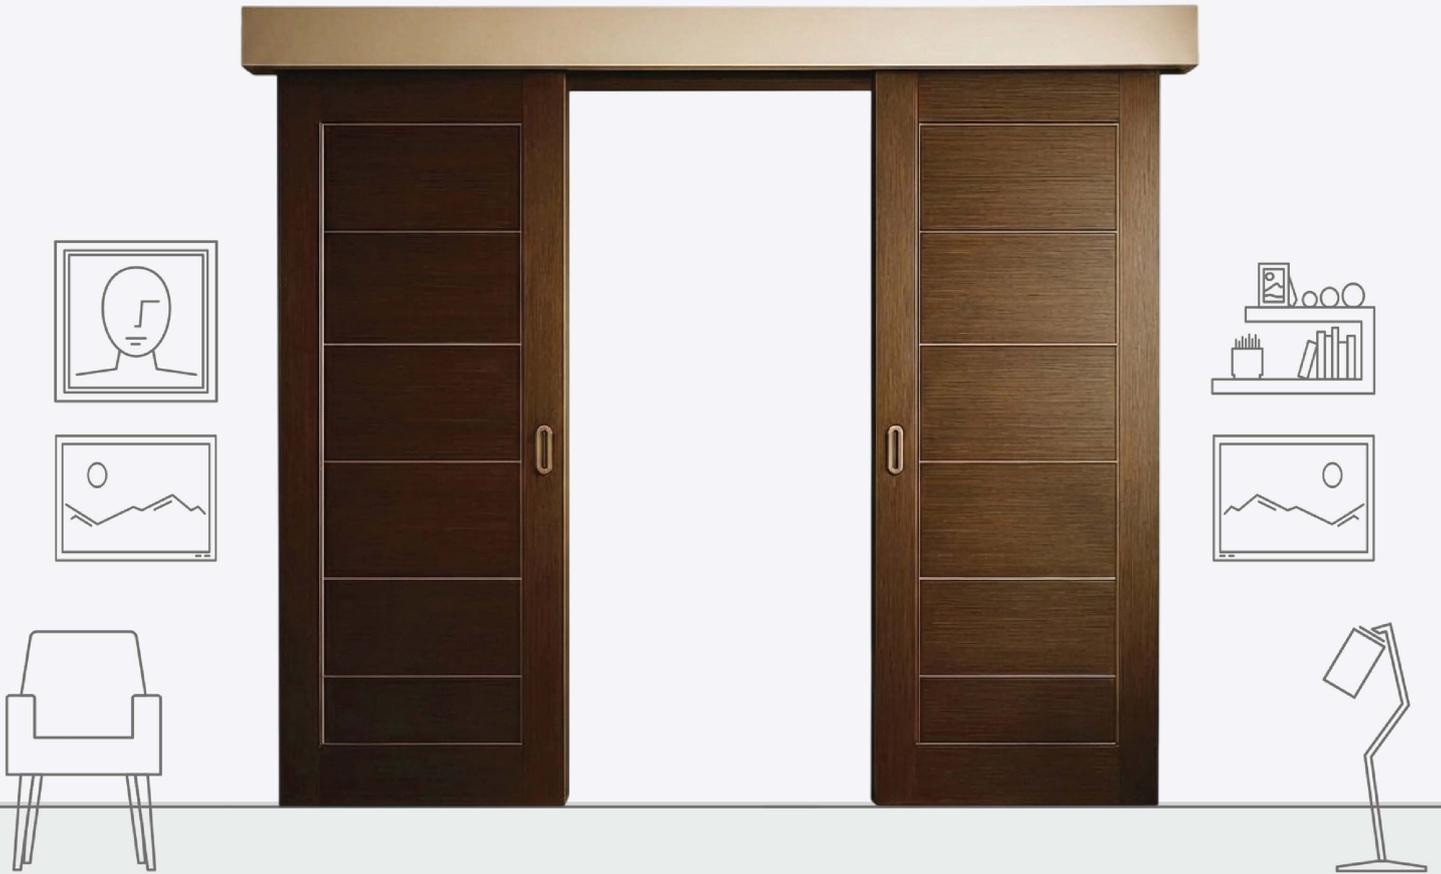

Every Winner Wood exterior door is a reflection of fine details and a unique touch that mirrors your refined taste.

We give attention to every stage, from design to final finishing, to deliver doors that combine security with luxury.

This way, the façade becomes an architectural signature that showcases your uniqueness and leaves an unforgettable first impression.

# SPACE SAVING DOORS

---

# **SPACE SAVING DOORS**

---

## **Sliding doors that redefine flexibility and luxury together.**

In Winner Wood sliding doors, modern creativity with its elegant lines meets classical refinement in its timeless details.

Our doors are smart, offering you spaciousness.

They bring together functionality and luxury.

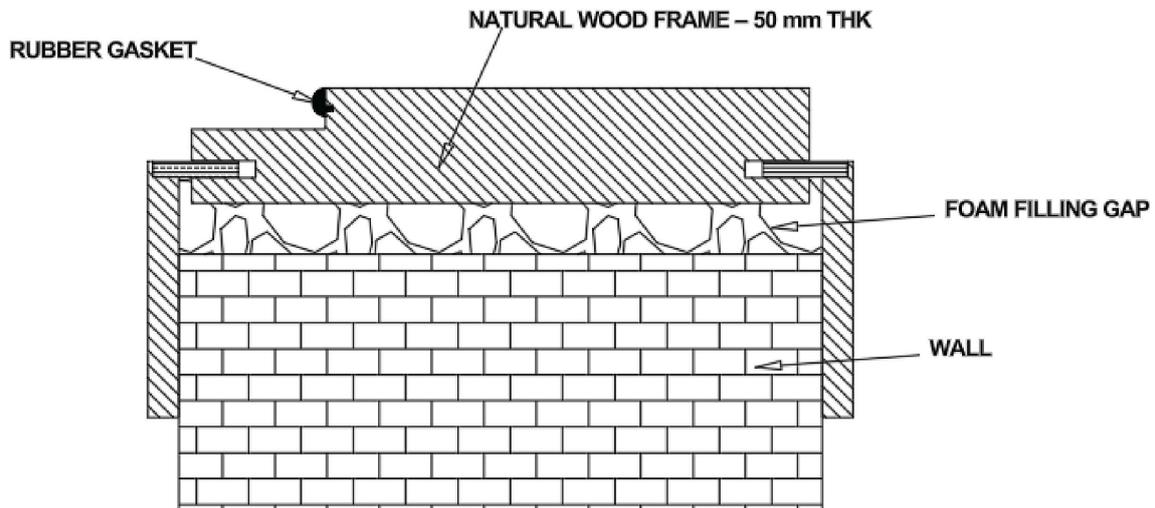

Our doors transform into architectural elements that redefine elegance in contemporary spaces.

# ***DOOR COMPONENTS***

# DOOR FRAMES

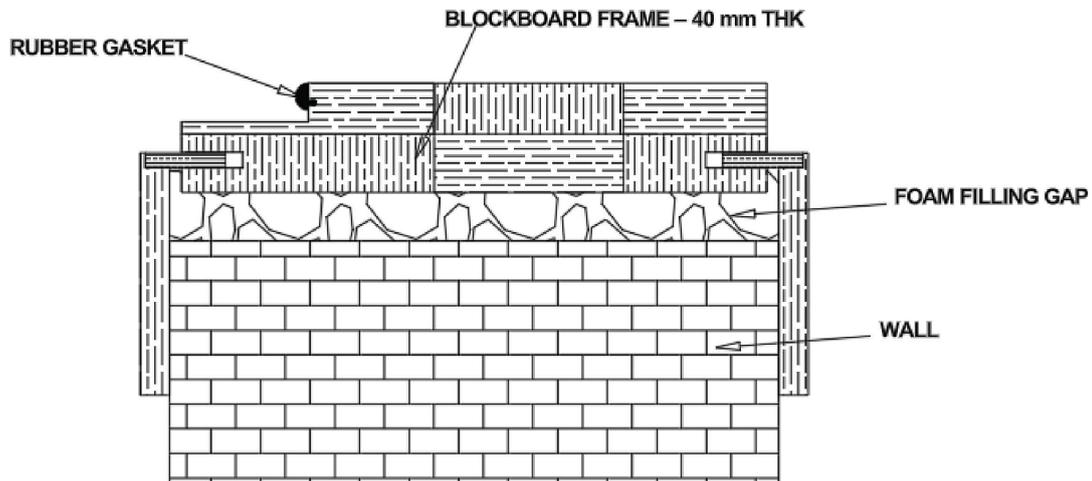

## TIMBER FRAME (NATURAL WOOD)

Timber Frames Crafted from premium natural wood, such as pine, oak, and mahogany, our frames combine strength, elegance, and durability. Each piece is carefully selected to ensure perfect alignment, smooth operation, and long-lasting performance. The robust construction resists warping and maintains its shape over time, while the natural wood surface allows for finishing, staining, or painting to suit any design. Ideal for a wide range of applications, these frames deliver reliability, timeless beauty, and unmatched quality in every door.

# DOOR FRAMES

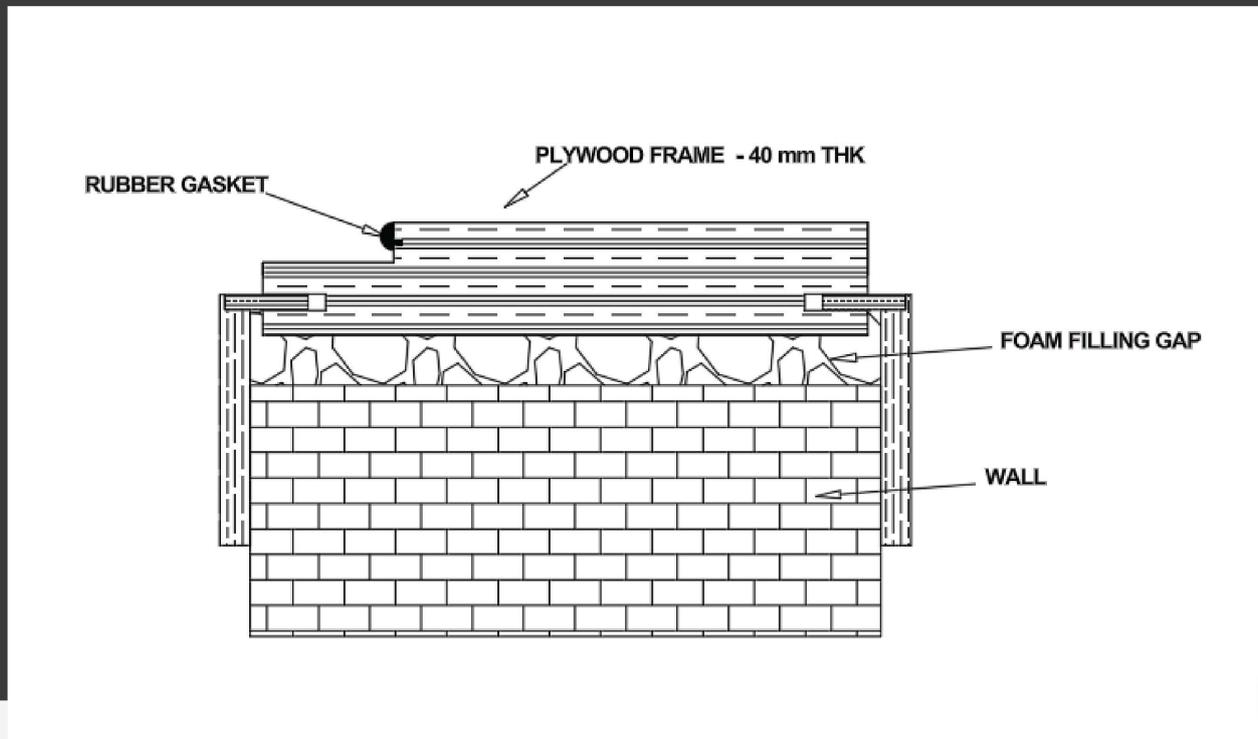

## BLOCKBOARD FRAMES

Blockboard door frames are designed with a solid core structure to provide superior rigidity and excellent load-bearing performance. Built to withstand heavy use, they offer outstanding durability and resistance to daily wear, making them suitable for high-traffic and heavy-duty applications. Combining strength with refined craftsmanship, blockboard frames ensure dependable performance while maintaining a premium appearance.

# DOOR FRAMES

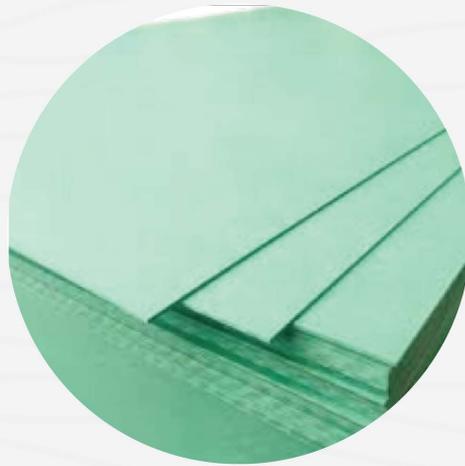

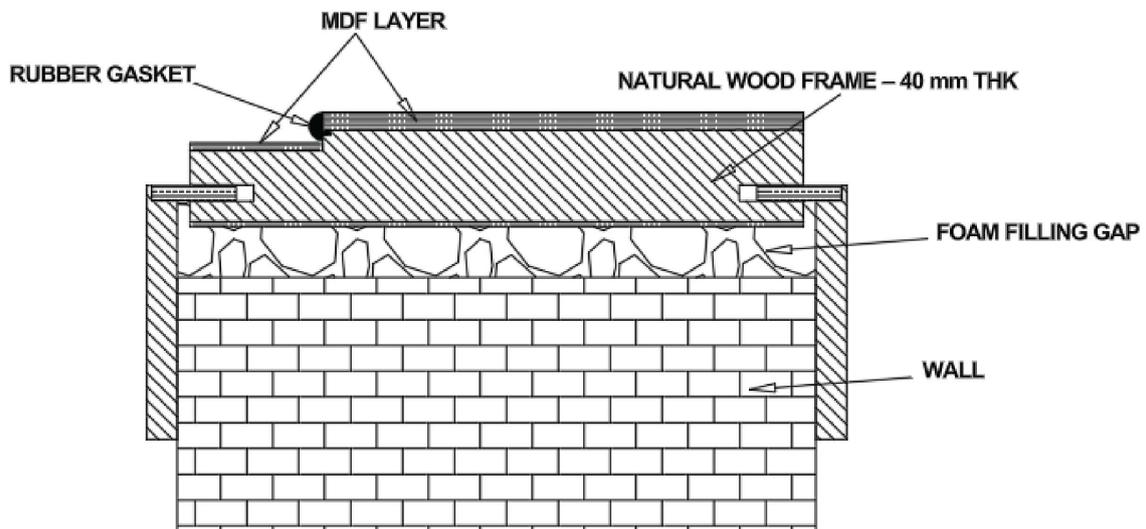

## PLYWOOD FRAMES

Plywood door frames are engineered using a multi-layered wood construction that delivers enhanced strength, durability, and long-term stability. Their layered structure provides high resistance to warping and cracking, ensuring precise door alignment and reliable performance over time. With a smooth and consistent surface, plywood frames support various finishes and are ideal for modern interiors that demand durability, accuracy, and refined detailing.

# DOOR FRAMES

## COMPOSITE FRAME

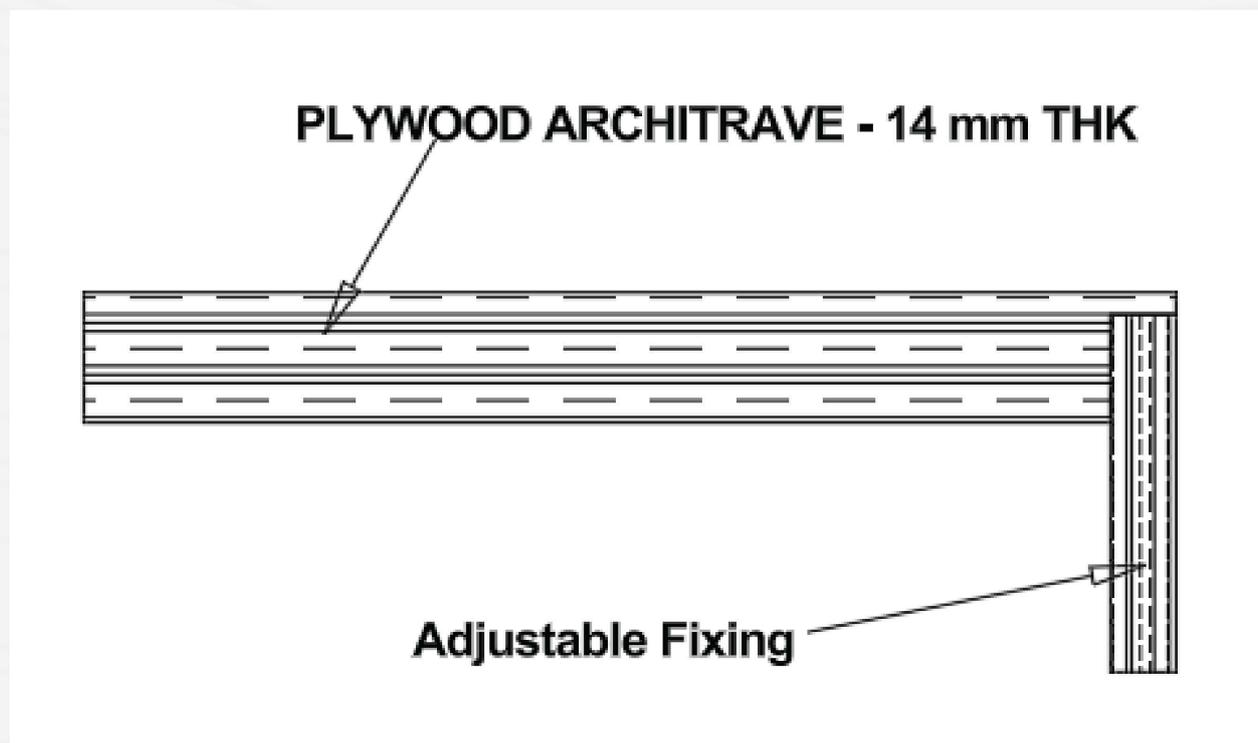

Crafted for durability and elegance, Composite Frames combine the natural strength of wood with the smooth finish of MDF. This engineered solution ensures stability, resists warping, and provides a flawless surface ready for any finish. Perfect for doors that demand both premium quality and refined aesthetics, delivering a sophisticated look while maintaining long-lasting performance.

# DOOR ARCHITRAVES

## PLYWOOD ARCHITRAVES

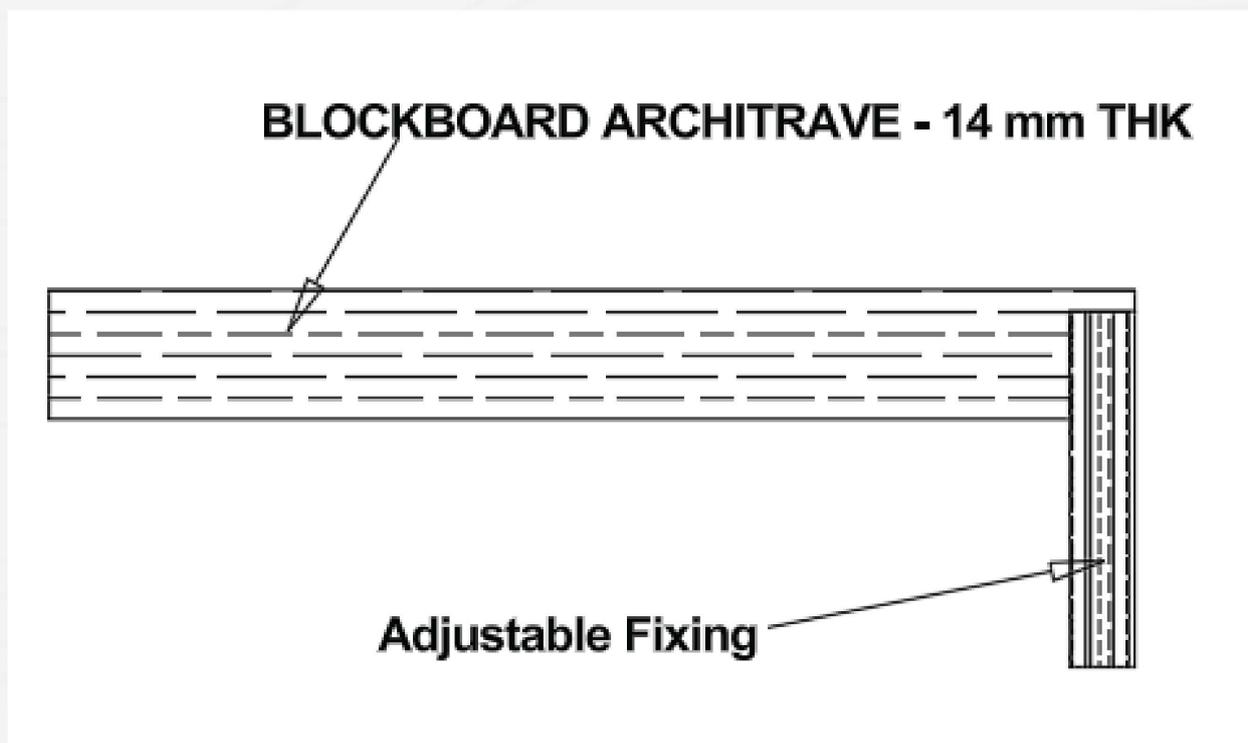

Plywood door architraves are crafted from multi-layered wood construction, combining strength with refined elegance. Their engineered layers ensure stability and resistance to warping or cracking, maintaining perfect alignment around door openings. With a smooth and uniform surface, plywood architraves are ideal for showcasing high-quality finishes, enhancing the visual appeal of interiors, and adding a touch of sophistication to any doorway.

# **DOOR ARCHITRAVES**

## **BLOCKBOARD ARCHITRAVES**

Blockboard architraves are engineered with a solid core structure formed by carefully arranged wood strips, delivering enhanced strength and dimensional stability. This internal blockboard construction minimizes warping and ensures consistent performance over time, while the smooth outer layers provide an excellent base for high-quality finishes. The result is a refined architrave that combines structural reliability with a clean, premium appearance suitable for modern interiors.

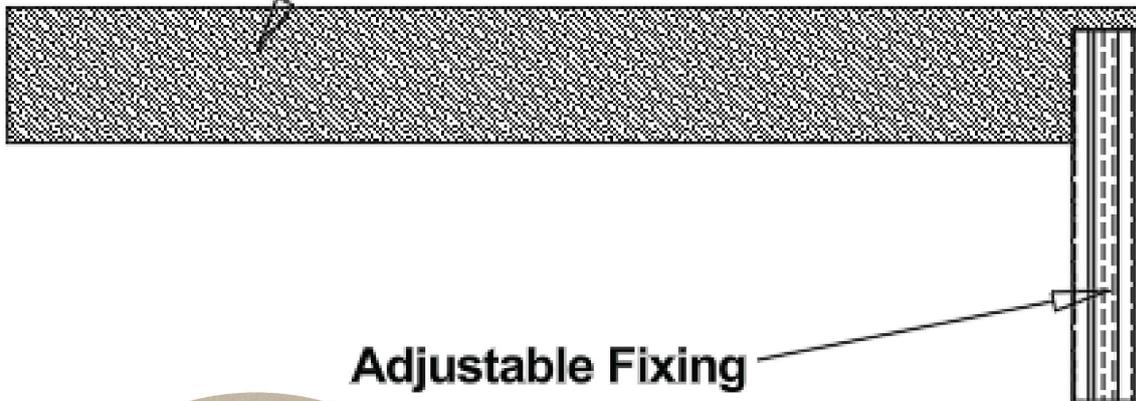

# **DOOR ARCHITRAVES**

## **MOISTURE-RESISTANT MDF ARCHITRAVE**

Crafted from high-quality moisture-resistant MDF, these architraves combine durability with refined aesthetics. Engineered to withstand humidity and prevent warping, they maintain a smooth, flawless surface ideal for painting or veneering. Perfect for modern interiors or wet areas, they enhance doorways with a polished, sophisticated finish while ensuring long-lasting performance.

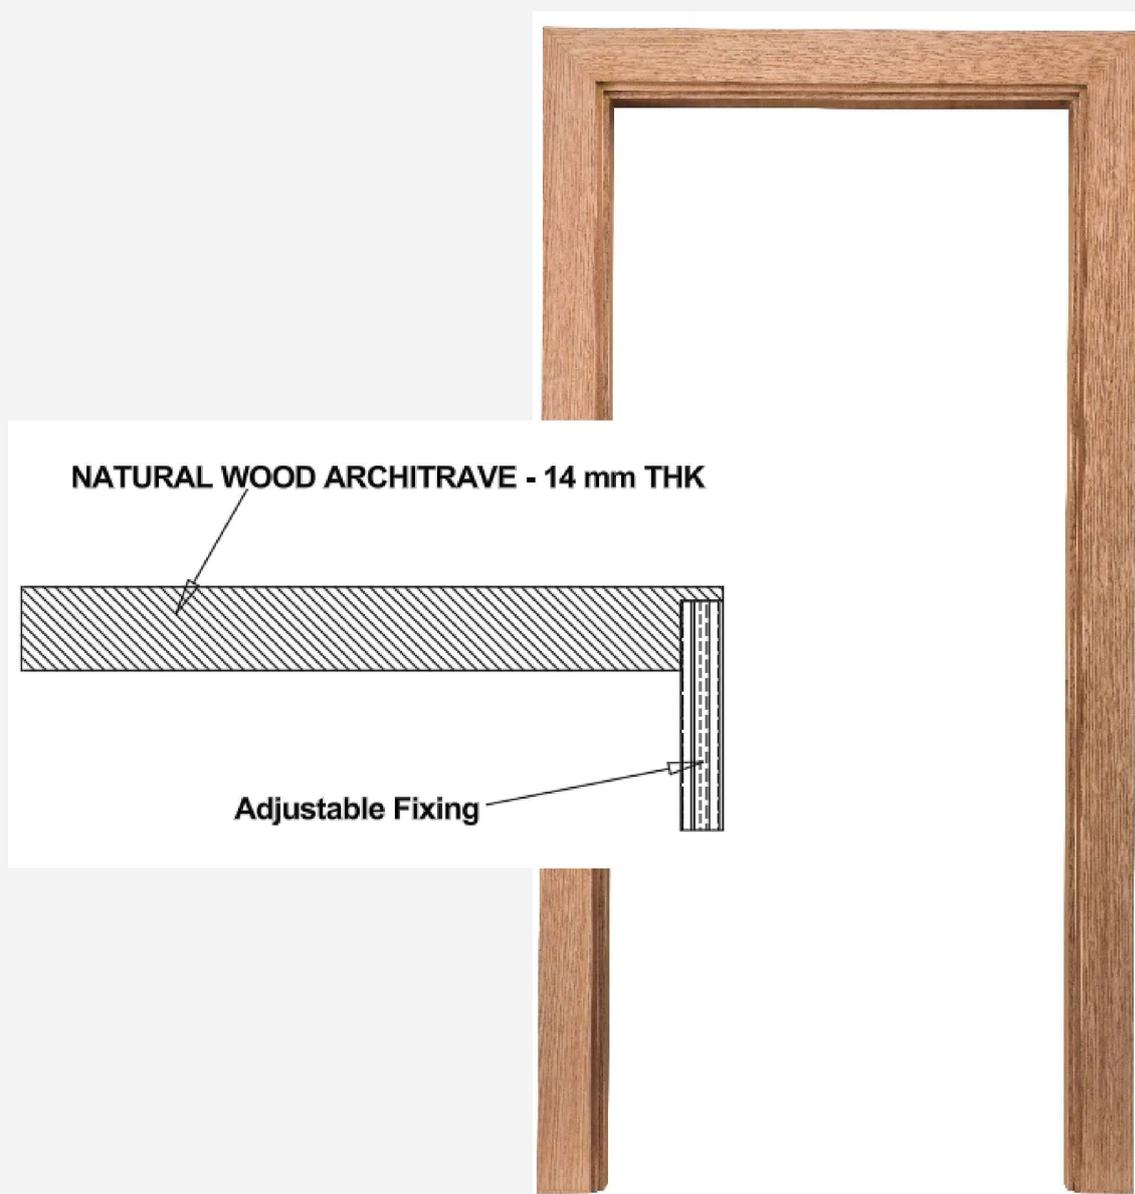

**MR MDF ARCHITRAVE - 14 mm THK**

# DOOR ARCHITRAVES

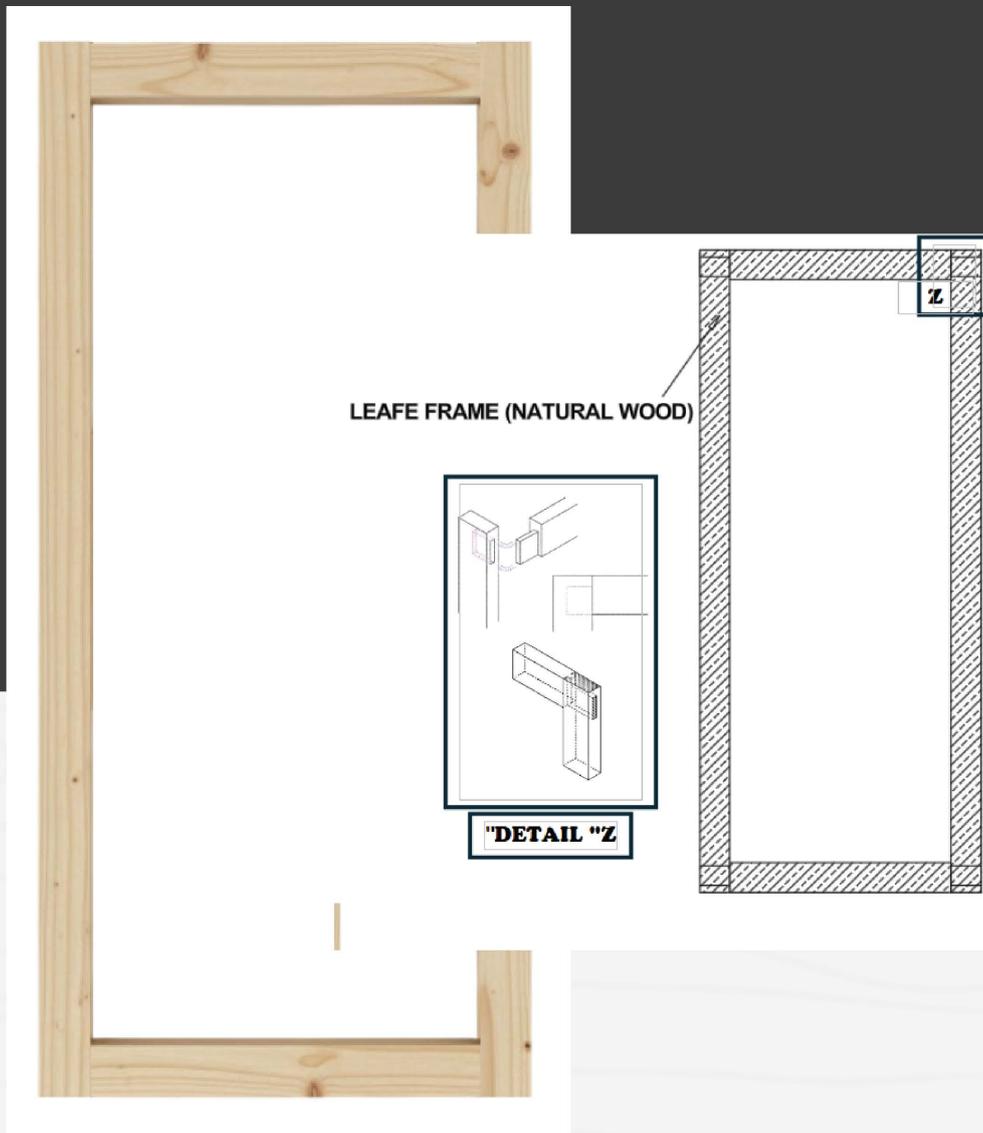

## NATURAL WOOD ARCHITRAVES

Crafted from premium natural timber, these architraves bring warmth, elegance, and timeless beauty to any interior. Their solid construction ensures durability and dimensional stability, while the rich wood grain adds character and sophistication. Ideal for high-end finishes, they enhance doorways with a natural, luxurious touch that elevates the overall aesthetic of the space.

# DOOR LEAF FRAMES

## NATURAL WOOD DOOR LEAF FRAME

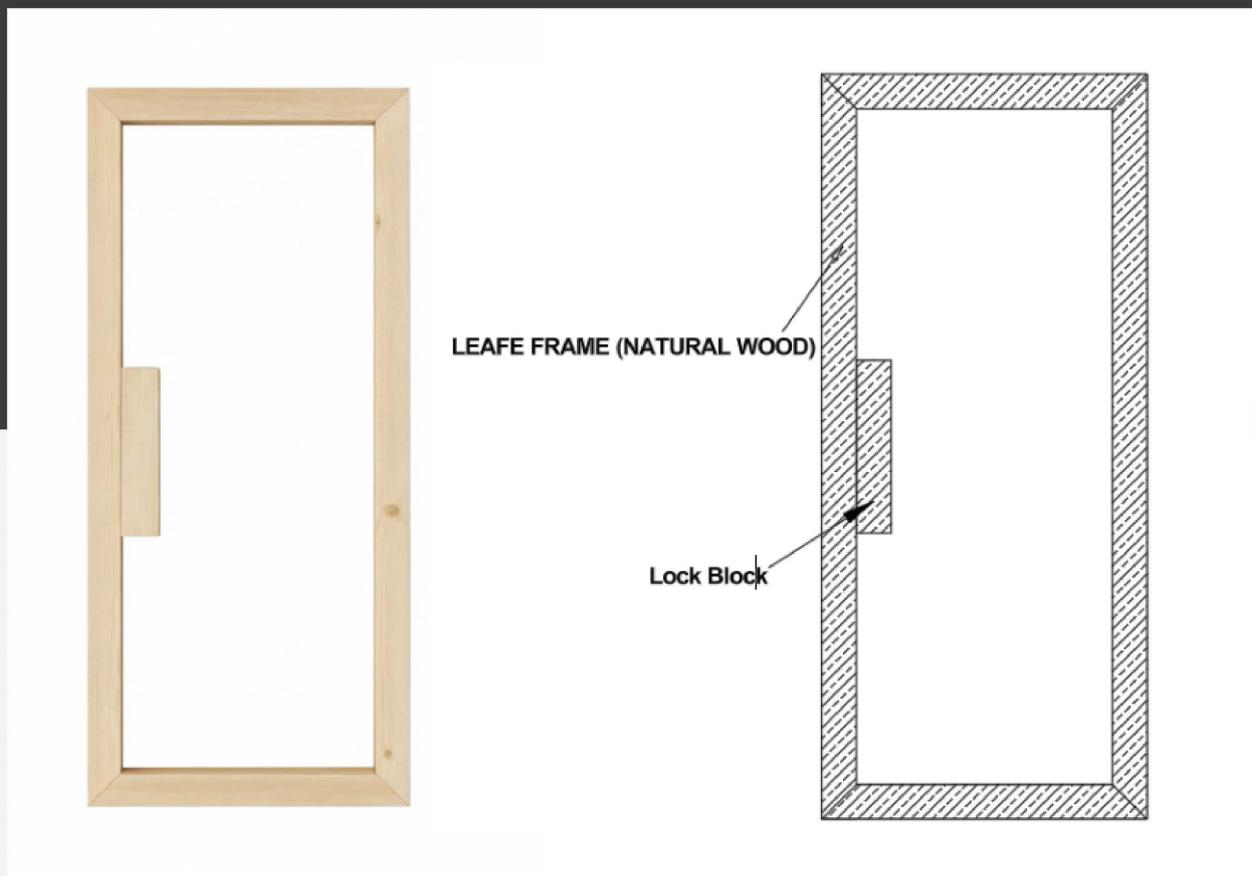

Crafted from premium Natural wood, this door leaf frame combines lightweight elegance with exceptional workability. Its fine grain and smooth surface provide a perfect foundation for finishes, adding warmth, character, and a refined aesthetic to any interior.

### Mortise and Tenon Assembly

This traditional joinery method ensures precise interlocking between frame components, providing superior strength and dimensional stability. The mortise and tenon system enhances structural integrity, reduces movement over time, and guarantees a tight, seamless fit that reflects high-quality craftsmanship and long-lasting performance.

## **DOOR LEAF FRAMES**

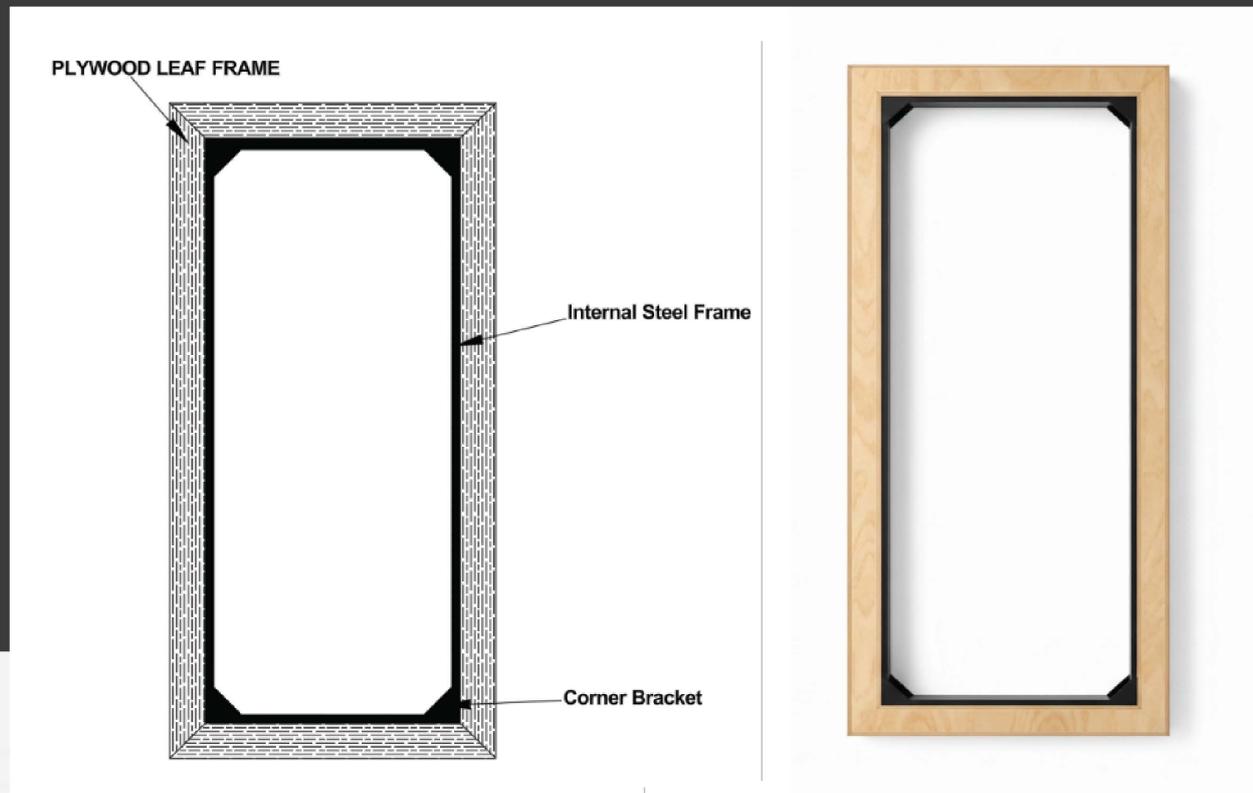

# **45° MITER JOINT ASSEMBLY**

This assembly technique delivers a clean, refined appearance with perfectly aligned corners. The 45° miter joints create a continuous, elegant visual flow around the door leaf, enhancing the overall aesthetic. A concealed lock block is integrated behind the lock area to reinforce fixing strength, ensuring secure hardware installation, accurate alignment, and a premium finishing standard.

# DOOR LEAF FRAMES

## PLYWOOD DOOR LEAF FRAME

The door leaf frame is manufactured from high-quality hardwood plywood, providing excellent structural strength and long-term dimensional stability. Its engineered construction ensures reliable performance under varying environmental conditions, making it suitable for demanding applications.

To meet different project requirements, the frame can be supplied with integrated steel reinforcement for enhanced resistance to bending and twisting, or without steel reinforcement where a lighter structure is preferred—offering flexibility without compromising quality.

# ***DOOR CORE TYPES***

# **DOOR CORE TYPES**

## ***HOLLOW CORE CHARACTERISTICS***

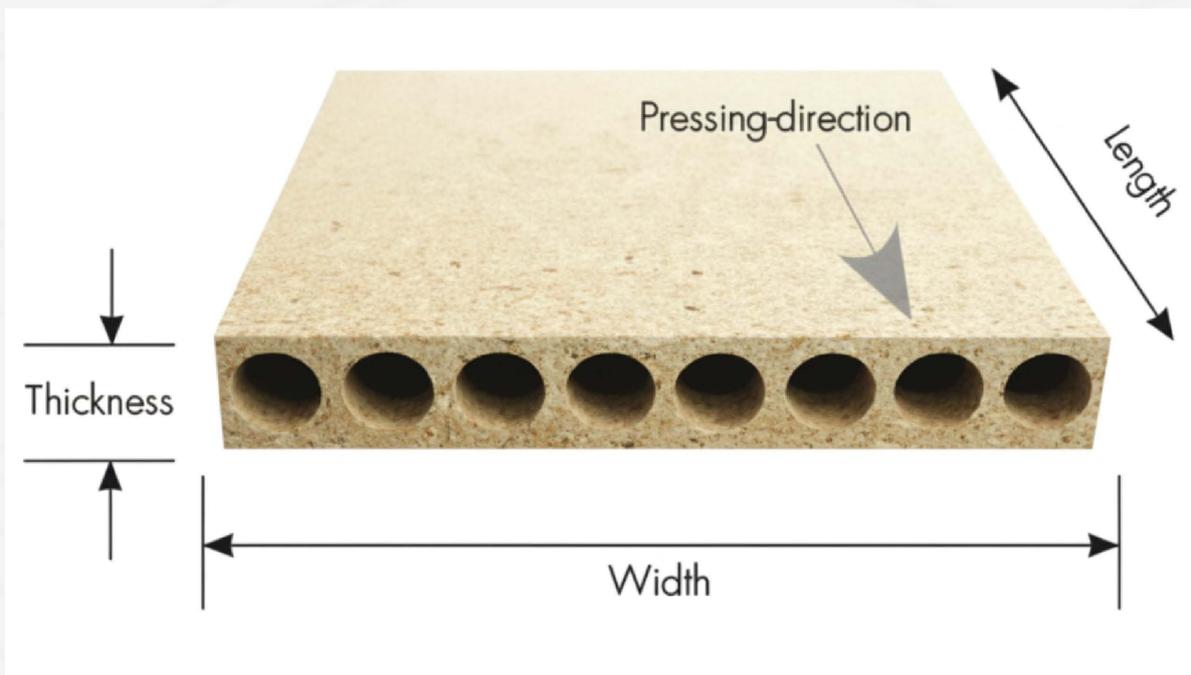

- Lightweight construction reducing overall door mass for easier installation and operation.
- Sound reduction performance appropriate for standard interior applications.
- Good dimensional stability under normal temperature and humidity variations.
- Balanced load distribution across the door leaf, enhancing structural behavior.
- Reduced stress on hinges and hardware contributing to smoother operation and longer service life.
- Cost-efficient infill solution compared to solid core alternatives for interior doors.
- Moderate resistance to impact, suitable for low to medium traffic areas.
- Uniform and flat internal support for MDF or HPL surface skins.

# ***DOOR CORE TYPES***

## ***MANUFACTURING STAGES OF TUBULAR CORE***

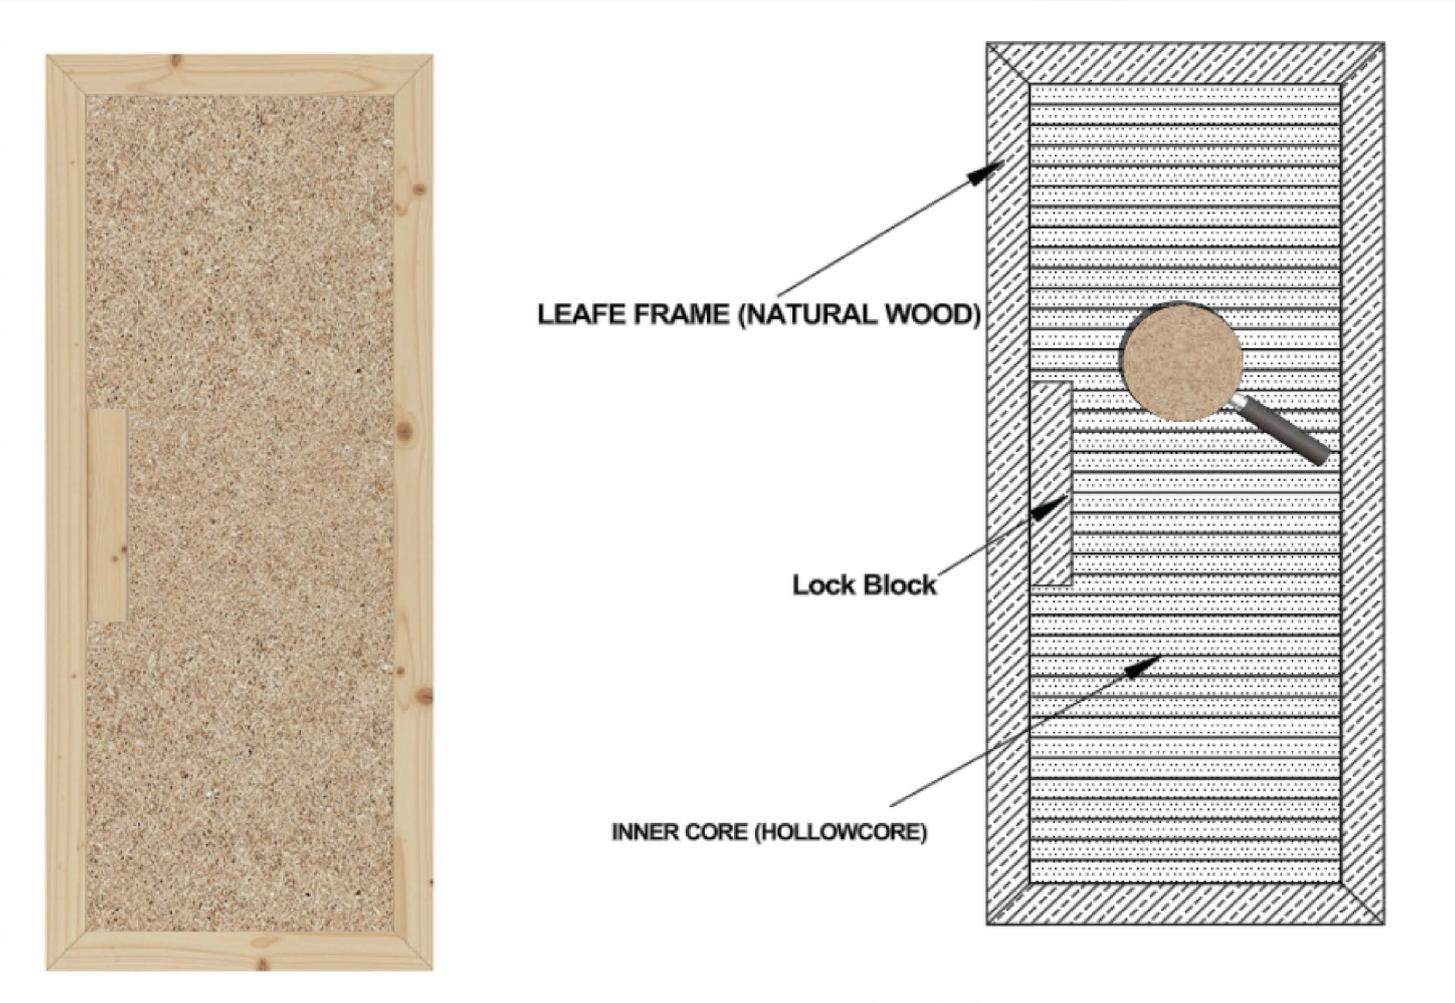

## ***TUBULAR CORE (HOLLOW-CORE) STRUCTURE***

# ***DOOR CORE TYPES***

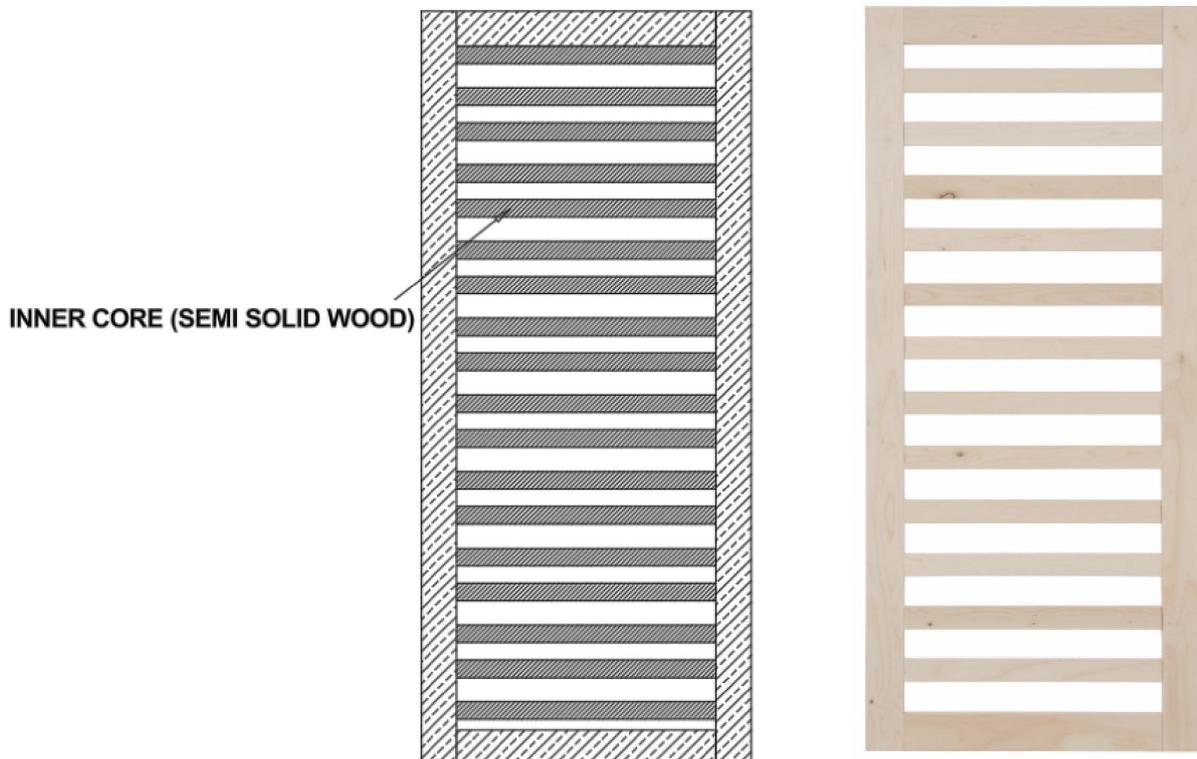

## ***INTERNAL CORE STRUCTURE OF THE DOOR LEAF***

# DOOR CORE TYPES

## SEMI-SOLID CORE CONSTRUCTION

- The door leaf features a semi-solid core design that combines strategically placed solid wood sections with controlled internal spacing to achieve an optimal balance between strength and weight. This engineered core structure provides reliable internal support while reducing overall door weight for smoother operation.
- The semi-solid core enhances dimensional stability and helps limit deformation over time, offering dependable performance without sacrificing practicality. It delivers a well-balanced solution that blends durability, efficiency, and consistent quality for a wide range of interior applications.

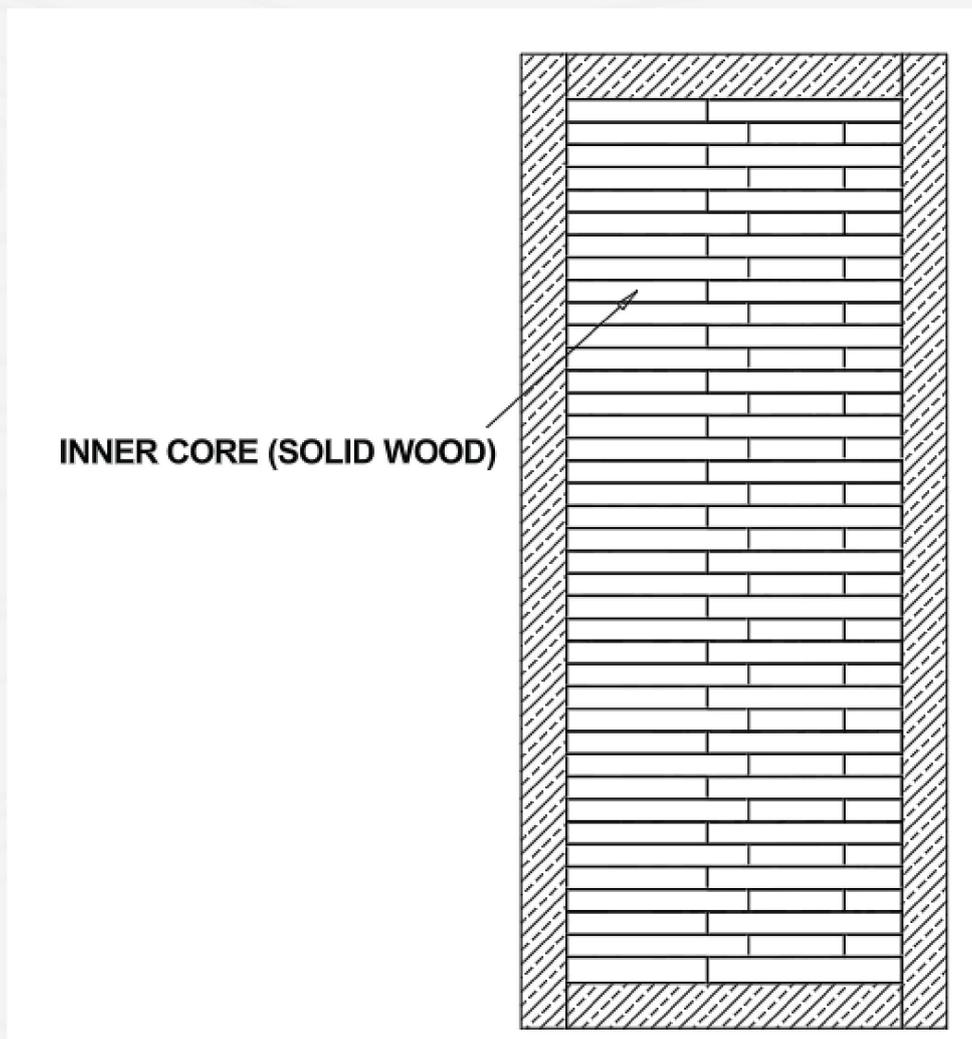

# **DOOR CORE TYPES**

## **SOLID CORE CONSTRUCTION**

The door leaf features a solid core construction formed from tightly arranged solid wood blocks, assembled without voids to create a dense and uniform internal structure. The interlocked layout provides continuous support to both sides of the door leaf, enhancing overall rigidity and balance.

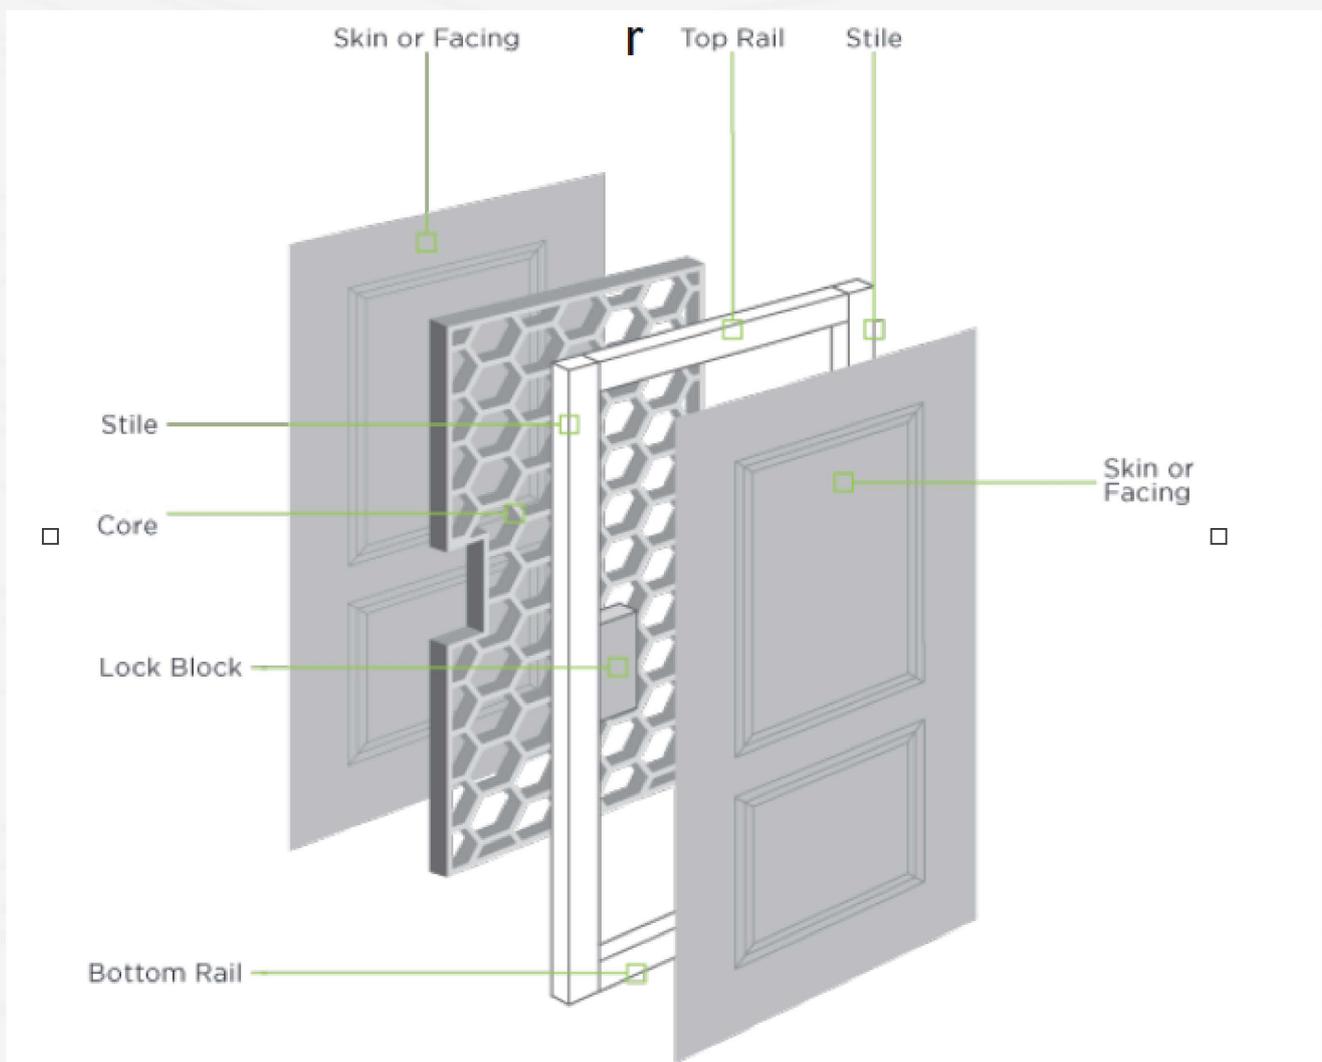

This solid core design delivers exceptional strength and durability, minimizing the risk of shrinkage or warping over time. The result is a stable, well-balanced door leaf that maintains its shape, performance, and premium feel under long-term use.

# DOOR CORE TYPES

## HONEYCOMB CORE CONSTRUCTION

- The door leaf features a honeycomb core structure designed to achieve maximum weight reduction while maintaining structural balance. This engineered core provides uniform internal support, enhancing door stability and smooth operation without adding unnecessary load on hinges and hardware.
- The honeycomb construction contributes to consistent performance, dimensional stability, and cost efficiency, making it an ideal solution for interior applications where practicality, ease of use, and refined finishing are required.

# ***DOOR CORE TYPES***

## ***HONEYCOMB CORE CONSTRUCTION***

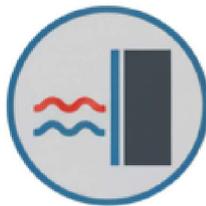

# MINERAL CORE

The door leaf features a mineral core designed to deliver enhanced fire resistance and thermal insulation. This non-combustible core material acts as an effective barrier against heat and flame propagation, supporting the door's role as a critical element in fire-rated door systems.

In addition to fire performance, the mineral core provides excellent dimensional stability and acoustic insulation, maintaining door integrity under extreme conditions. This construction ensures reliable protection, compliance with fire safety requirements, and consistent long-term performance without compromising structural strength or appearance.

# TEXTURE AND COLOURS

Winner Wood offers a comprehensive range of finishes designed to suit different applications, environments, and design requirements, ensuring durability, consistency, and refined aesthetics.

## 4.1 Water-Based Paint Finish

Water-based paint finishes provide a smooth, uniform surface with excellent color consistency. This environmentally friendly solution offers good resistance to moisture and everyday wear, making it ideal for both residential and commercial applications. The finish delivers a clean, modern appearance while maintaining ease of maintenance and long-term performance.

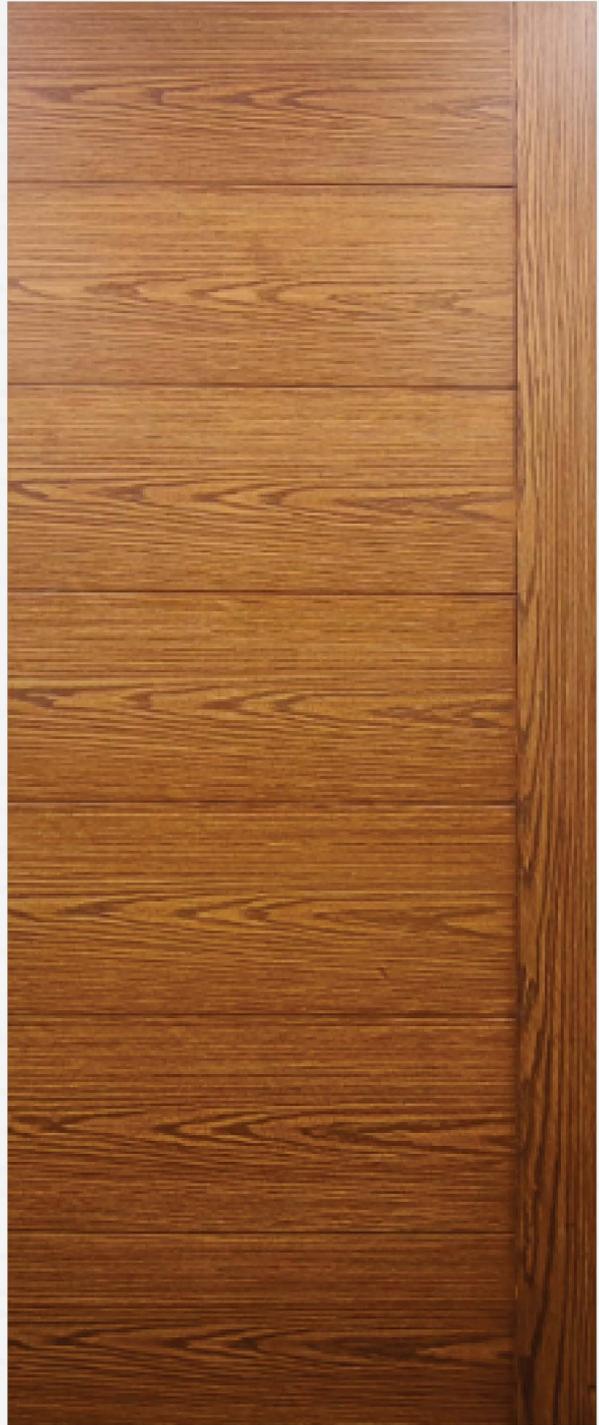

### Water-Based Paint – Key Characteristics

- High resistance to scratches and abrasion.
- Moisture and water resistant.
- Good heat resistance.
- UV-resistant, preventing color fading.
- Easy to clean and maintain.
- Wide variety of designs and finishes.
- Excellent color stability over time.

# ***TEXTURE AND COLOURS***

***PRE-FINISHED***

***AFTER-FINISHED***

# TEXTURE AND COLOURS

## duco Paint Finish

Duco paint finishes are applied to achieve a high-quality, refined surface with either matte or glossy effects. This premium finishing system enhances the door's visual depth and elegance while offering increased resistance to scratches and surface imperfections. Duco finishes are ideal for projects that demand a sophisticated, high-end appearance.

### Key Characteristics:

- High resistance to scratches and wear.
- Moisture and water resistant.
- Heat resistant.
- UV resistant.
- Easy to clean and maintain.
- Variety of designs and finishes.
- Color fastness and long-lasting premium appearance.

# TEXTURE AND COLOURS

## LAMENATES – DECORATIVE FINISHES

Laminates are applied on MDF or other engineered wood substrates, providing a durable, cost-effective, and high-quality surface solution for interior applications. Available in a wide variety of solid colors, wood-inspired grains, and modern textures, laminates offer excellent resistance to scratches, stains, and daily wear. High-Pressure Laminates (HPL) further enhance durability, heat resistance, and long-term performance for high-traffic areas. This versatility makes laminates ideal for doors, furniture, cabinets, and other interior surfaces where both aesthetics and durability are essential

### Key Characteristics:

- High resistance to scratches and wear.
- Moisture and water resistance.
- Heat resistance.
- Easy to clean.
- Wide range of designs and textures.
- Color stability over time.

# TEXTURE AND COLOURS

## 4.4 Natural Wood Veneer Finish

Natural veneer doors are made by applying thin slices of real wood over engineered wood substrates, providing the authentic look and feel of solid wood while optimizing material efficiency. Veneers showcase the natural beauty and unique grain patterns of various wood species, ranging from light to dark tones, offering warmth and elegance to interior or exterior non-fire-rated applications. They feature a smooth texture suitable for sanding, painting, or polishing with a wide variety of finishes, allowing designers to achieve the desired aesthetic. Natural veneers combine durability for daily use with long-term color stability, making them ideal for doors, furniture, and other interior surfaces where a premium, natural wood appearance is desired.

### Key Characteristics:

- High resistance to scratches and wear.
- Moisture and water resistance.
- Heat resistance.
- Easy to clean.
- Wide range of designs and textures.
- Color stability over time.

# EDGE BANDING & LIPPING

Edge finishing is a crucial factor in door quality and longevity. Doors can be protected with either matching PVC edge banding or solid natural wood lipping, safeguarding exposed edges while enhancing durability. Proper edge finishing ensures a seamless visual transition between the door face and its edges, improves resistance to impacts and moisture, and maintains a refined, premium appearance.

## 1. Natural Veneer Strip

Natural veneer strips are thin slices of real wood applied over engineered wood substrates to enhance the surface with an authentic wood appearance. They showcase the natural grain patterns and elegance of the wood, allowing sanding, painting, or polishing to achieve the desired finish. Ideal for doors, furniture, and decorative interior surfaces, they combine aesthetics with durability and long-term color stability.

# **EDGE BANDING & LIPPING**

## **PVC Edge Banding**

The edges of the door leaf, frame, and architrave are sealed with PVC edge bands using high-performance industrial adhesives. This ensures strong bonding, complete edge protection against impacts and scratches, and enhances the overall durability of the door. PVC edge bands are applied in the same approved melamine color code as the door leaf, frame, and bar, providing uniform color, a consistent appearance, and a high-quality professional finish.

# ***EDGE BANDING & LIPPING***

## **3. Lipping Natural Wood Edge Strips**

Lipping consists of solid natural wood strips, typically made from Oak or Beech, applied to cover and protect the edges of doors and panels. It provides strength, impact resistance, and a premium, refined appearance, complementing both laminated and veneered surfaces with a smooth, natural finish.
